

Application Serial No. 10/748,968

RECEIVED
CENTRAL FAX CENTER
NOV 16 2006REMARKS

Applicant thanks the Examiner for her cooperation and assistance during an Interview,
5 which was held on 14 November 2006. During the Interview, the Applicant took the
opportunity to explain the invention to the Examiner and contrast it with the references
of record, *i.e.* Turnasella and Williams *et al.* The Examiner pointed out that some of the
Applicant's claim terminology was confusing. Applicant suggested various changes and
the Examiner indicated that such changes would seem to contrast the invention
10 sufficiently with the references of art such that the claims could avoid such art. Applicant
appreciates that the Examiner did not indicate that the claims would be allowable and
that the Examiner has the obligation to review the claims submitted herewith, as well as
consider additional art, if appropriate. However, Applicant is of the opinion that the
presently submitted claims address all of the concerns raised by the Examiner during
15 the Interview and in the Office Action of 16 August 2006, and that the claims should,
therefore, place the application in allowable condition. In so responding, Applicant is of
the opinion that all of the issues raised in the Office Action of 16 August 2006 have
been addressed. In particular, in addition to addressing the substantive rejections,
Applicant also has corrected the status identifier in Claim 60 as pointed out by the
20 Examiner.

Accordingly, the application is considered to be in allowable condition and the Examiner
is urged to withdraw the rejections based on art and otherwise and allow the application
to issue as U.S. Letters Patent. Should the Examiner deem it helpful, she is encouraged
25 to contact Applicant's attorney, Michael A. Glenn, at (650) 474-8400.

Respectfully submitted,

Julia A. Thomas
